Contents

Preface v

Proton Pumping P Systems 1
Artiom Alhazov, Matteo Cavaliere

A Binary Data Structure for Membrane Processors:
Connectivity Arrays 19
Fernando Arroyo, Juan Castellanos,
Carmen Luengo, Luis F. Mingo

Parsing with Active P Automata 31
Gemma Bel-Enguix, Radu Gramatovici

Universality of Minimal Symport/Antiport:
Five Membranes Suffice 43
Francesco Bernardini, Andrei Păun

Collapsing Hierarchies of Parallel Rewriting
P Systems Without Target Conflicts 55
Daniela Besozzi, Giancarlo Mauri,
György Vaszil, Claudio Zandron

Evolution and Observation: A New Way to Look
at Membrane Systems 70
Matteo Cavaliere, Peter Leupold

Tiling Rectangular Pictures with P Systems 88
Rodica Ceterchi, Radu Gramatovici, Nataša Jonoska

Simulating Boolean Circuits with P Systems 104
Rodica Ceterchi, Dragoş Sburlan

P Systems Running on a Cluster of Computers 123
Gabriel Ciobanu, Guo Wenyuan

Implementing in Prolog an Effective Cellular Solution
to the Knapsack Problem 140
Andrés Cordón-Franco, Miguel A. Gutiérrez-Naranjo,
Mario J. Pérez-Jiménez, Agustin Riscos-Núñez,
Fernando Sancho-Caparrini

On the Dynamics of PB Systems: A Petri Net View 153
Silvano Dal Zilio, Enrico Formenti

P Systems Generating Hexagonal Picture Languages 168
K.S. Dersanambika, Kamala Krithivasan, K.G. Subramanian

A Membrane System for the Leukocyte Selective Recruitment 180
Giuditta Franco, Vincenzo Manca

P Systems with Cutting/Recombination Rules Assigned to Membranes 190
Franziska Freund, Rudolf Freund, Marion Oswald, Maurice Margenstern, Yurii Rogozhin, Sergey Verlan

ω-P Automata with Communication Rules 202
Rudolf Freund, Marion Oswald, Ludwig Staiger

The Number of Membranes Matters 217
Oscar H. Ibarra

An Agent-Based Behavioural Model of Monomorium Pharaonis Colonies 231
Duncan Jackson, Marian Gheorghe, Mike Holcombe, Francesco Bernardini

Can Hyperbolic Geometry be of Help for P Systems? 239
Maurice Margenstern

A Linear-Time Solution to the Knapsack Problem Using P Systems with Active Membranes 248
Mario J. Pérez-Jiménez, Agustin Riscos-Núñez

A Reconfigurable Hardware Membrane System 267
Biljana Petreska, Christof Teuscher

P Systems and Petri Net 284
Zhengwei Qi, Jinyuan You, Hongyan Mao

Simulation of Mobile Ambients by P Systems. Part 1 302
Vladimir Rogozhin, Elena Boian

Computing Partial Recursive Functions Through Transition P Systems 318
Alvaro Romero-Jiménez, Mario J. Pérez-Jiménez

P Systems with External Input and Learning Strategies 339
José M. Sempere

A Distributed Simulation of Transition P Systems 355
Apostolos Syropoulos, Eleftherios G. Mamatas, Peter C. Allilomes, Konstantinos T. Sotiriades

About Splicing P Systems with Immediate Communication and Non-Extended Splicing P Systems 367
Sergey Verlan

Author Index 381
